**Recent articles**    [Outokumpu to double ferrochrome production capacity](#) Jun 9, 2010 Outokumpu has decided to restart the project to double the Group's ferrochrome production capacity in Finland. The investment totals EUR 440 million including interest and is based on an updated feasibility study conducted during the spring

[Outokumpu invests EUR 104 million in Quarto plate production](#) Jun 9, 2010 Outokumpu invests EUR 104 million to increase capability and capacity of stainless steel quarto plate production in Degerfors. The investment is in line with Outokumpu's strategy to increase the proportion of special grades. It also strengthens the Group's position as a world-leading quarto plate producer.    [The end of pickling pastes?](#) Jun 4, 2010 An innovative machine that safely removes heat discoloration from stainless steel welds is being launched in the UK for the first time.    [Ancon Tension System](#) Apr 26, 2010 Ancon Tension Systems can be used internally to restrain roof timbers and large areas of glazing.

[Sandvik extend Duplex range of solid round bar](#) Feb 16, 2010 Sandvik duplex and super duplex stainless steels in solid round bar form are now available ex-stock in an extensive size range from the company's UK warehouse

[Thyssen introduces metal 'velcro' fastener](#) Dec 9, 2009 Success "sticks" to Velcro: Since it was first registered for patent by the Swiss inventor Georges de Mestral in 1951, the hook and loop fastener has become a commonplace item, used to fasten everything from clothing and shoes to bandages to wiring sleeves in cars. And now it has been taken a stage further. A hook and loop closure made of temperature-resistant stainless steel has been awarded this year's Steel Innovation Prize by the German Steel Industry Association. The material for this new invention is supplied by ThyssenKrupp Nirosta Präzisionsband GmbH in Schalksmühle

[Carpenter introduces new blade alloy](#) Dec 9, 2009 Carpenter Technology Corp. (NYSE: CRS), Wyomissing, PA, USA, is introducing Carpenter CTS-BD1, a new alloy that is part of the Carpenter CTS™ alloys suite. These particular alloys offer many attributes making them attractive for use in consumer, industrial and medical knife blade applications.    [What nickel adds to stainless steel](#) Apr 21, 2009

[New overlay welding strip from sandvik](#) Apr 21, 2008 Sandvik is introducing a unique, new welding strip, Sandvik 24.29.5.LCu for overlay welding, which significantly improves welding productivity, reducing the welding time by half.

[Stainless steel for flapper valves](#) Feb 27, 2008 New research by Sandvik's R & D organization has confirmed the benefits of using Sandvik Hiflex™ strip steel for the manufacture of flapper valves for compressors.
